

CortiveSM

The next generation of **Intelligent Banking**

Cortive by Kinective brings Kinective solutions together behind one secure sign-on and creates a shared platform, data, and connectivity foundation for Intelligent Banking.

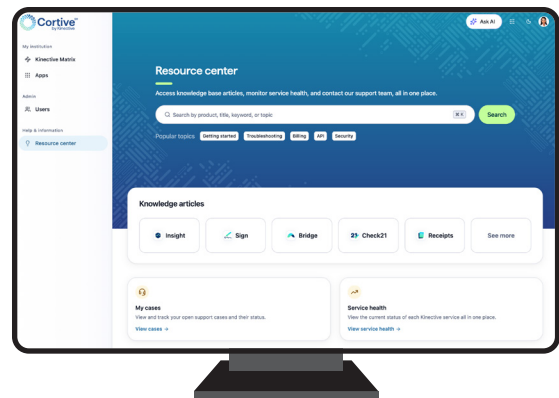

One Platform. One Connected Experience.

Cortive gives your institution **one front door** to the Kinective portfolio:
One login, one place for help, and a clearer view of how your products and integrations fit together.

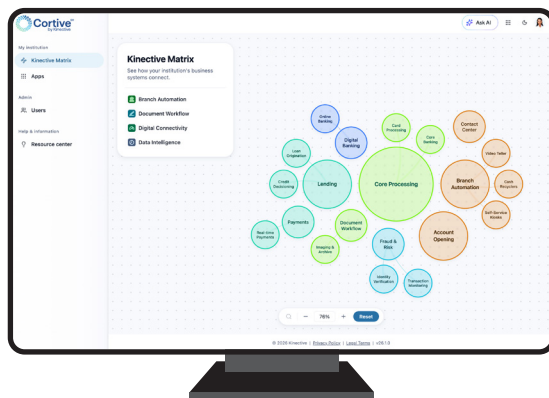

Single Sign-On & Launcher

A shared sign-in, centralized identity, and product-to-product access without logging in again.

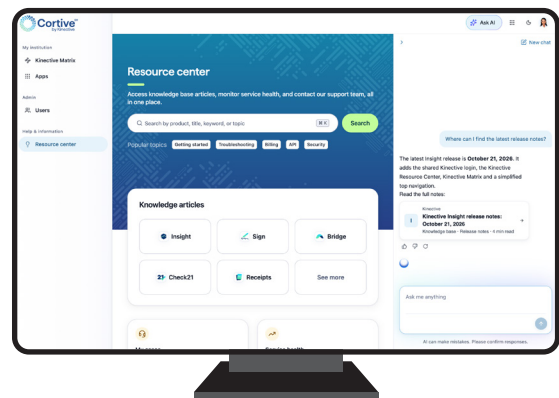

Resource Center

A unified destination for knowledge, in-product help, support case status, service health, and AI-assisted answers.

Kinective Matrix

A visual view of your Kinective products, current subscriptions, partner integrations, and expansion paths.

Cortive Assistant

Intelligent portfolio-wide search to answer technical and operational questions instantly

A Foundation for Intelligent Banking

Cortive makes Kinective feel like one platform, not just a collection of products. By reducing friction and adding context across the experience, it helps users get more value from the systems they already rely on and gives institutions a clearer path to what comes next.

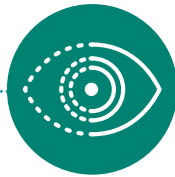

As Cortive evolves, this foundation can support more intelligent experiences that help teams anticipate needs, make informed decisions, and move work forward, while keeping people in control.

Access the Kinective portfolio through **one shared login and product launcher**.

Find **knowledge, support resources**, service health, and AI-assisted answers in one place.

See **your current products**, subscriptions, partner integrations, and opportunities to expand.

Ask **portfolio-wide questions in plain language** and get faster answers about products, integrations, service health, and support.

Get more from the Kinective **solutions you already use.**
