| Disk Space                                    | <p>Drives need to be in some type of redundant storage (RAID array, SAN, etc.) to prevent downtime.</p> <ul style="list-style-type: none"><li>• <b>C</b> (OS drive): At least 70GB of free space after installing the operating system (OS) and all Windows updates.</li><li>• <b>E</b> (Application drive): 60GB if you will manage drive space (and increase as needed). 160GB to allocate space one time.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Kinectio Sign Server (Web Application Server) | <p><b>CPU</b></p> <ul style="list-style-type: none"><li>• Under 100 Users: 4 Cores (or VCPUs for VMware) @ 3.0 GHz or faster</li><li>• Over 100 Users: 8 Cores (or VCPUs for VMware) @ 3.0 GHz or faster</li></ul> <p><b>Memory</b></p> <ul style="list-style-type: none"><li>• Under 100 Users: 16GB RAM</li><li>• Over 100 Users: 32GB RAM</li></ul> <p><b>Supported Operating Systems</b></p> <ul style="list-style-type: none"><li>• Windows Server 2016 (Standard and Datacenter), Windows Server 2019 (Standard), Windows Server 2022 (Standard)</li></ul> <p><b>Software</b></p> <ul style="list-style-type: none"><li>• .Net Framework 4.7.1 or later</li><li>• IIS</li></ul> <p><b>Additional Requirements</b></p> <ul style="list-style-type: none"><li>• Gigabit Network Interface</li><li>• An SSL certificate must be issued to your fully qualified domain name. The SSL certificate must be purchased from an external provider such as GoDaddy or Verisign. Self-certified SSL certificates are not supported.</li><li>• This server must be joined to the same domain as the client workstations.</li><li>• The domain must have normal access to a fully functional Domain/Active Directory server.</li></ul> |

## Server Requirements (Continued)

### CPU

- Under 100 Users: 4 Cores (or VCPUs for VMware) @ 3.0 GHz or faster
- Over 100 Users: 8 Cores (or VCPUs for VMware) @ 3.0 GHz or faster

### Memory

- Under 100 Users: 16GB RAM
- Over 100 Users: 32GB RAM

### Database Server

#### SQL Server

- Under 100 Users: Kinective Sign comes preinstalled with SQL Server Express.
- Over 100 Users: A dedicated SQL Server is required.
- SQL Server Standard 2016 SP2, 2017, 2019, 2022.
- If your SQL Server uses an SSL certificate, this certificate must be trusted on the Kinective Sign server.

#### Supported Operating Systems

- Refer to Microsoft's OS requirements based on your SQL version:  
<https://docs.microsoft.com/en-us/troubleshoot/sql/general/sql-server-windows-8-later-versions>
-

# Workstation Requirements

|                        |                                          |                                                                                                                                                                                                                                                                                                              |

1. For hardware inquiries and purchases, please contact your Kinective representative.

2. For Topaz devices, refer to the Topaz SigPlusExtLite User Installation Guide: [https://www.topazsystems.com/software/SigPlusExtLite\\_UserInstall.pdf](https://www.topazsystems.com/software/SigPlusExtLite_UserInstall.pdf). For silent installations, refer to <https://www.topazsystems.com/silentinstallerform.html>.

3. Refer to the Adobe Acrobat Sign system requirements for details about remote signer requirements: <https://helpx.adobe.com/sign/system-requirements.html>.

4. iPads must be configured and fully functional on the institution's network before use. Kinective Sign is supported with the mobile browser experience only.

5. Recommended for the best consumer experience. Not supported on thin client configurations.

6. Fiserv Verifast module and Verifast tablet are required.

7. To use a camera with Google Chrome, Microsoft Edge, or Mozilla Firefox web browsers, HTTPS is required.

8. Other cameras may work. Financial institutions are responsible for testing.

9. Consult your Kinective representative to determine if there are any additional requirements for your integration.

10. Photos are not supported with Internet Explorer mode in Microsoft Edge.

# Supported Thin Client Configurations
